THE CENTENARY.

Comprehensive Preparations in Illinois.

Is New York To Be on the Same

ENGLISH VIEWS ON THE CENTENNIAL.

Side with Texas?

News has been received at the city bureau of the Centennial in regard to the preparations of the great state of Ulinois for the Centennial. The od example set by lowa has been followed by excellent results throughout the West. In lows every county has been thoroughly organized with s view to make as full a contribution toward the State's display as possible, and there is now a fair prospect that fillness will follow in lowa's wake, that every county in lilinois will be organized with energy and no nains will be spared to secure an adequate representation of its magnificent resources. Mr. J. P. Reynolds, t e President of the Centennial Board for Himois, reports that the sentiment among the people of Illinois is lavorable to the thorough execution of this design and speaks in hopeful terms of the aid to be expected rom the capitalists of that growing State. The suggestion of pre aring models of citles seems to have been received with especial warmth of approbation in Chicago, probably because the growth of the Garden City has been more marvellous than that of any other in this country.

THE MODELS OF CHICAGO. It has been proposed that the series of models of Chicago should begin with one reproducing its condition in 1830; then one giving a picture of that it was before the great fire, and one showing what it was after the conflagration, with the ruins; and, flually, one representing it as it will be in 1876. A good deal of talk has been excited by the suggestion in Chicago, but thus far no pracucal steps have been taken to secure the execution of this plan. There is no doubt, however, that, even if this suggestion is not adopted, the wealthy men of Chicago will spare no efforts to make the display of Hilinois equal to that of her sister States. With the exception of Pennsylvapia, the Eastern States have altogether lagged behind their aisters in the West in preparations for the patriotic enterprise. The Legislature of llineis is expected soon to pass the appropriation necessary to pay the unavoidable expenses of the Board of Centennial Managers in that State. TEXAS AND NEW YORK.

It will be remembered that the Legislature of Fexas has rejected a proposition to appropriate a small amount for def aying the expenses of preparing for the Centennial-and this in the face of the munificent appropriations made by Asiatic States such as Japan! A pretty spectacle for a State of the Union to refuse the aid willingly granted by Sweden, Japan and many other foreign countries. den, Japan and many other foreign countries. The incident gave rive to a colloquy between the writer and ex-Governor Bigler, the financial agent of the Centennial in this city.

"Governor, I see that the Legislature of Texas has reinsed to vote a small amount for the Centennial."

The old gentleman was ready with an answer which hit the hall upon the head:

"That's so," he replied, slowly; "but! hope New York goes not want to be on the same side with Texas"—ninting at the failure of our Legislature thus lar to appropriate an adequate sum for the same purpose.

thus ar to appropriate an adequate sum for the same purpose.

THE COMMISSION FOR THE STATE.

It has been the occasion of considerable comment that the Governor has not yet appointed the Commissioners for this State while other Governors have done so long ago. Why was this thus? Was he only with the cases of the removed Lorporation Counsel and Fire Commissioners? was the query that naturally rose to many people's tipe. "Or," asked the gossips who take a "social," a domestic view or the current affairs, "is our worthy Governor engaged in the landage pursuit of giving us a "governess' in a quite new sense of the word?" He this as it may, the fact remains that the Commissioners of the state on New York have not yet been a pointed, atthough Governor Tilthe Commissioners of the state of New York have not yet been a pointed, although Governor Thien, in his message, expressed a great interest for the Centennial. However, the innit does not seem to the with him, but there is a defect in the law under which these Commissioners must be appointed. Ex-Governor Bigier and General Goshorn will probably soon visit the Governor in Albany to confer with him personally on this studiet, and to submit to him their views as to the needs of the Centennial and the extant of the aid which the State should jurnish to the celebration of American independence.

The Centennial in England.

THE CENTENNIAL IN EMPLOYER
The comments of the English press show the tyely interest with which the Centennial is viewed to the Angle-Saxon kinsmen in Europe. The lively interest with which the Centennial is viewed by our Annie-Saxon kinshen in Europe. The Telegraph recently said, and its graceful words with no doubt, be rescanced by the inspirity of the intelligent British public:—"Mr. Forster expressed the general inclination of this country to ms continuents at Braddord, which is to regard the American Cencenary with hearty sympathy and corolal good will. The genuilty with which Lord Derby, in his letter of list December to General Science, accepts the Invitation to Her Majesty's government to take part in the International Derty, in his letter of hast December to General Scheider, accept the Invitation to Her Majesiy's government to take part in the International Examination to be held to 1806, has met with the sincere approbation of his fellow countrymen; and the responsibility of naming the commissioners who are to represent Engiand at Philadelphia could not be intrusted to better mads than those of the Foreign Secretary. Such, too, among the public as have never crossed the Atlantic, and who imagine that a trip from Liverpool to New York resembles the passage from Bover to calars, with its horrors multiplied one hundred old, stonil take heart of grace and go it they can. They will never know what it is o enjoy a sea voyage until they commit themselves to one of the magnificent steamsarps now plying between the old and new worlds. Instead of enduring the miseries inseparable from a crowded cockboat, 500 or 400 tons in burden, they will find that the Russia, the Adriatic, the City of Crester, the Spain and many other noble specimens of naval architecture can wait them from Liverpoo to New York with a speed and steadiness which 'turn what some oeem danger to delight.' The inte Sir Henry itoliand used to may that a couple of trips per annum actions the Affantic world add a score of years to a man's the annum the common and the contensory at Philadelphia Induces many Europeans to try the effect of breatning the pure ozene examines but good can result from the cetter acquaintance." The Bottel intercourse octower in the liverpool can result from the cetter acquaintance."

THE ROTEL INTEREST seems to be one of those which especially appre-ciate the importante of the Centennial from a seems to be one of those which especially appreciate the important of the Centennial from a material boint of view. Almost all the leading hotels have subscribed to the Centennial stock, the proprietors being fully aware or the golden betweet they will reap next year when thousands and thousands or strangers from all parts of the country and from all over the world will fill the city. From a mere serial, point of view there is probably no interest which will reap so great and ammediate benefits as that of the New York notes. Europeans, more especially, know out little about failsdelpans, and, while they will go there to enjoy the hoge "show," they will need the to enjoy the hoge "show," they will need the same of their money in the country which their country men have hitherto drained of its treasures of gold.

LONG ISLAND CITY PRIMARIES.

The contest for the Mayoralty of Long Island City three years ago between Ditmars and Debevotse, although a flerce one, resulted in a victory for Debevoise. This year the same parties are in the fleid, and, though Depevoise's election is conteded, Ditmars' briends are not leaving a stone anturned to secure their leader's election. Yesterday the "Noole" wing of the democracy field their primaries, and it was believed were solid to a man for Dilmars. Strange, however, Depevoise carried these out of the five wards. Everything passed of harmoniously in the different wards, with the exception of the Fourth. When it became known that the Debevoise party were in the Exceptancy the doors were broken open and one of the inspectors, humber to except the angry mob. The inspectors, humber to except the angry mob. The inspectors in the propose out of the window and the band boxes pushed after him. Long before the hour for beginning the inquest a large number of gentiemen had assembled about the office, most of them being friends of Mr. about a quarter of ten o'clock, and shortly after the woman Ihl was brought in. At this point Mr. Howe interposed an objection to the evidence being given by the witness as illegal and incompetent. The objection, however,

was overruled. Witness-When I found she was ill I went and got a physician. Dr. Barry, of Thirteenth street; he attended her till her death; I never saw Mrs. thi till the evening she was brought to the bedside of Mrs. Curtis for identification; Mrs. Curtis, however, had told me previous who had performed the operation, spelling Mrs. Ihl's name; I object to stating whether or not I turnished money to Mrs. Curtis; the unior tunate woman is dead, and I respect her memory too much to answer a question of that kind.

The question bringing out this answer was put by

At this juncture the witness pointed to the prisoner, Mrs. Ihi, and said, "That is the woman."

"I admitted her." continued the witness, "and she remained in Mrs. Curtis' room about an hour; I did not see her again until last Tuesday night, when she was brought there by an officer to be identified by Mrs. Curtis. Last Sunday I went up to Mrs. Curtis' room and she told me that as he had had an abortion produced and that Mrs. Ihi had performed the operation. She objected then to teling the woman's name, but said It was the same who had called the Taursday previous. On Tuesday she told me the name, speling It out, as sine seemed unable to pronounce it. She also said that Mr. If the property is a subject of the continued the pronounce it. THE DESPAIRING HUNGRY.

THE FOOD SUPPLY EXHAUSTED AT ST. JOHN'S GUILD SCENES AT THE DOORS.

Notwithstanding the approach of spring weeks must still pass before work can be obtained by the thousands who are now idle and hungry. In all our touemen's there are families that have been unable by even the most desperate exertion to obtain any employment that would keep them from starvation. Fathers, mothers and even babes are daily and nightly enduring the most inguiful tertures of hunger in our very midst. Prayers for speedy death as a relief from suffering ascend nightly from huadreds of bleak homes. One store room has been o en during all this trying winter to the poot. From one door they have not gone empty handed, and the light from one window has brought a gleam of hope and life back

THE SUPLY OF FOOD EXHAUSTED.

The last crums of bread and the last pound of flour have been handed from the Guld's store to the poor. Nothing is left with which to leed those who come from hour to hour to bray for assistance at their doors. To listen to desparing words that would seem to have power to move a stone, to answer the glances of appealing eyes, to near children crying because they can be lought to near children crying because they can be lought to near children crying because they can be lought to near children crying because they can be lought to near the stience the pain of famishing, is terrible to bear. Yesterday a woman, eighty-live years of age, and barely able to stand without support, came to plead for her orphaned grandenliften. She stood at the head of a throng of the stone of the stone of the stone of the whose weakness and misery were greater than their own, she told her putful story, the tears streaming from her eyes, her winkled ace showed the last feeble discering emotion of which it was capable of expression after a long and trying lie. The little ones clinging to her sairt stood pale and abusined, looking from one need to another in a necessar, supplicating way. The old grandmother was begging for bread for them. Of neffecti she said, "I am very old; I have hved longer, nethand, the left may not remain.

It I can get no lood for them now they will stairly only in the some one to care for them when I am gone, and they may not remain.

It I can get no lood for them now they will stairly. On, sirs, for God's sake give me some lood for them? This, in substance, was the old woman's prayer, and when she had finished there was mirrier a dry eye among the insteader. A gentleman present whispered, "For pity's sake pring her mito the other room," and he rat out to return with a large and teaming bowt of magrant soop and a nottle of ale. A private purse could not supply the necessities of all the numpry, however, and where thes

It was understood that a meeting was to be held in the sawing room to devise some means of siding the hungry, and the Guild has issued an appeal impioring the aid of all charitable prople, without distinction of creed or nationality, in their good wors. A dollar subscription is proposed among the cierks and workingmen who retain employment for the relief of those who can find nothing to do and who have nothing to eat. It is believed at the Guild that as soon as the lacts are known the prosperous among our people will quickly respond, and that with a comparatively small sum the worst cases can be relieved and absolute starvation be prevented. The appeal closes by asking that donations of lood, face, clothing and money for the sufferers be sent immediately to the Rev. Alvah Wiswall, at No. 52 Varick street, and it is signed by all the officers of the organization.
